Hon. Commissioner of Patents  
 and Trademarks  
 Washington, DC 20231

Dear Sir:

Please amend this divisional application as follows:

Page 1 of the specification (taken from Serial No. 08/472,573), line 7, delete

"08/251,743, filed May 31, 1994" and substitute: 08/472,573, filed June 7, 1995, in turn

*A* a division of application Serial No. 08/251,743, filed May 31, 1994, now U. S. Patent  
 5,477,238,--.

Please add the following claims, copied from U. S. Patent No. 5,499,108, issued  
 March 12, 1996 to Cotte et al (assigned to Visioneer Communications, Inc.), for  
 purposes of interference, as later detailed:

*Sub B1*

1. A system comprising a document-driven scanning input device communicating with a computer, said input device comprising scanning means for generating image data representing the image of a document, and means, responsive to placement of a document by a user, for drawing the document into scanning relationship with said scanning means so that said scanning means generates image data representing the image of said document, wherein said placement alone is sufficient to initiate said
